WEATHER OF CONCERN

Weather of Concern

- A long duration of gusty Santa Ana winds with hot and dry conditions is expected for southwest California through Wednesday, bringing elevated fire danger.

Active Weather Warnings, Watches and Advisories by County:

- <https://alerts-v2.weather.gov/counties/CA>

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

*** Very dry and unseasonably warm weather through the weekend ***

High pressure over the North Ops region today will move offshore on Wednesday. N-NE/Offshore winds gusting to 25-35 mph in wind-prone areas from the western Sierra slopes to the coast will diminish this afternoon, but return at lighter speeds tonight into early Wednesday. Light W-N winds are expected Wednesday afternoon. Temperatures will be 15-20 degrees above normal today and 10-15 degrees above normal Wednesday. Humidity will be 12-25% and only recover to 20-40% in breezy areas overnight, then drop to 12-25% again on Wednesday.

A weak low pressure trough will pass over the region from N to S Wednesday night, allowing a bit stronger W-NE/Offshore winds for a few hours early Thursday. In general, warm and dry conditions with occasionally gusty night and morning NW-NE downslope winds can be expected from Thursday night through the weekend as the high pressure returns. A shallow marine layer and light onshore flow will provide relief for areas along the immediate coast from Wednesday afternoon through the weekend.

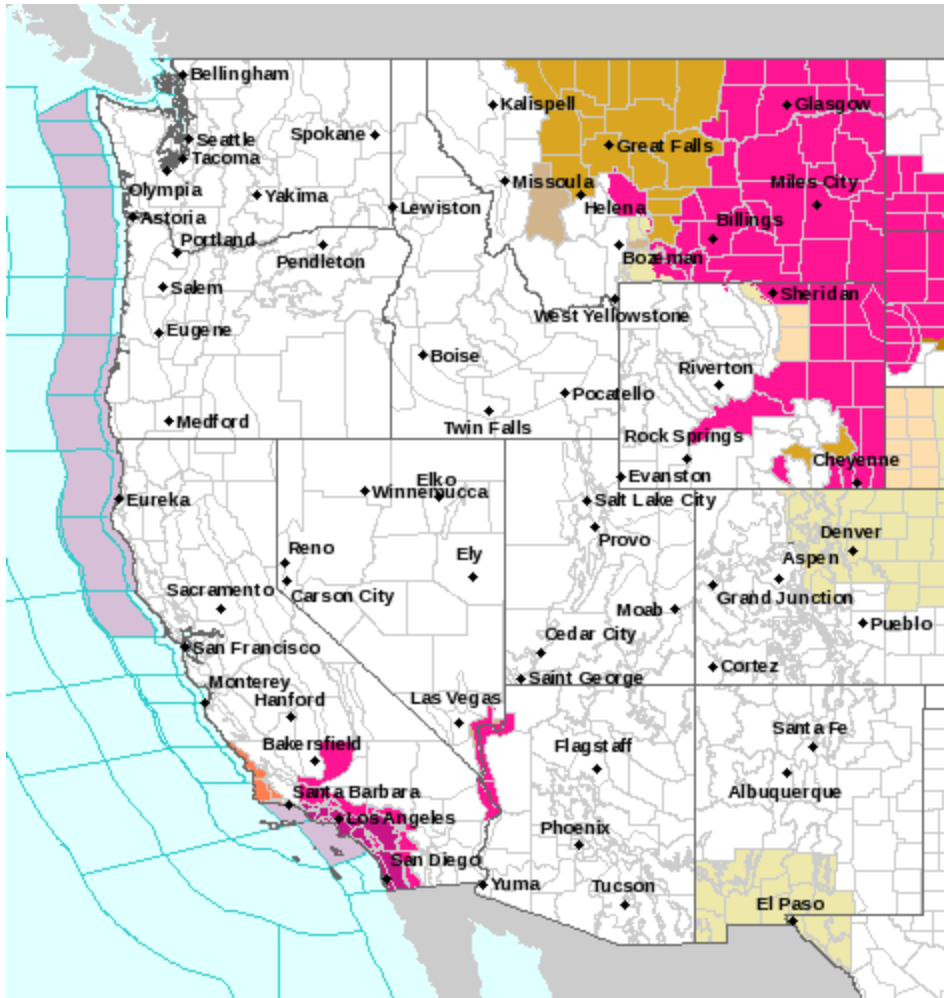

SOUTHERN CALIFORNIA

Strong Santa Ana Winds across Southern California today ***Record heat across portions of the area today***

The combination of strong high pressure aloft and surface offshore flow will bring gusty Santa Ana winds and record breaking heat to Southern California today. The strongest winds will be this morning through mid-afternoon with speeds in the 20-30 mph range along with gusts to near 60 mph across the higher elevations. Over the remainder of the area, winds will generally be light but it will be very warm and dry with temperatures much above normal. Daytime highs will be in the 70s to low 80s in the mountains, mid-80s to mid-90s over the inland areas north of Point Conception, and in the 90s to near 105 across the coastal and valley areas of Southern California. Minimum humidity will be in the 5-15% range with poor overnight recovery. The offshore winds will diminish across Southern California on Wednesday and temperatures will begin to slowly cool throughout the region, mainly along the coast. The area of high pressure aloft will weaken Wednesday and Thursday and then strengthen a little Friday and Saturday. Onshore flow should return to most of the area on Thursday with weak offshore flow Friday and into the Weekend. It will be cooler across the district during the latter half of the work week but daytime highs will still be above normal for this time of year. The warm and dry weather will likely last through the coming weekend.
